# **COVID-19 DISINFORMATION'S ARSENAL IS WELL SPREAD ACROSS THE EU, AND DISINFORMATION ABOUT AFGHANISTAN IS ON THE RISE**

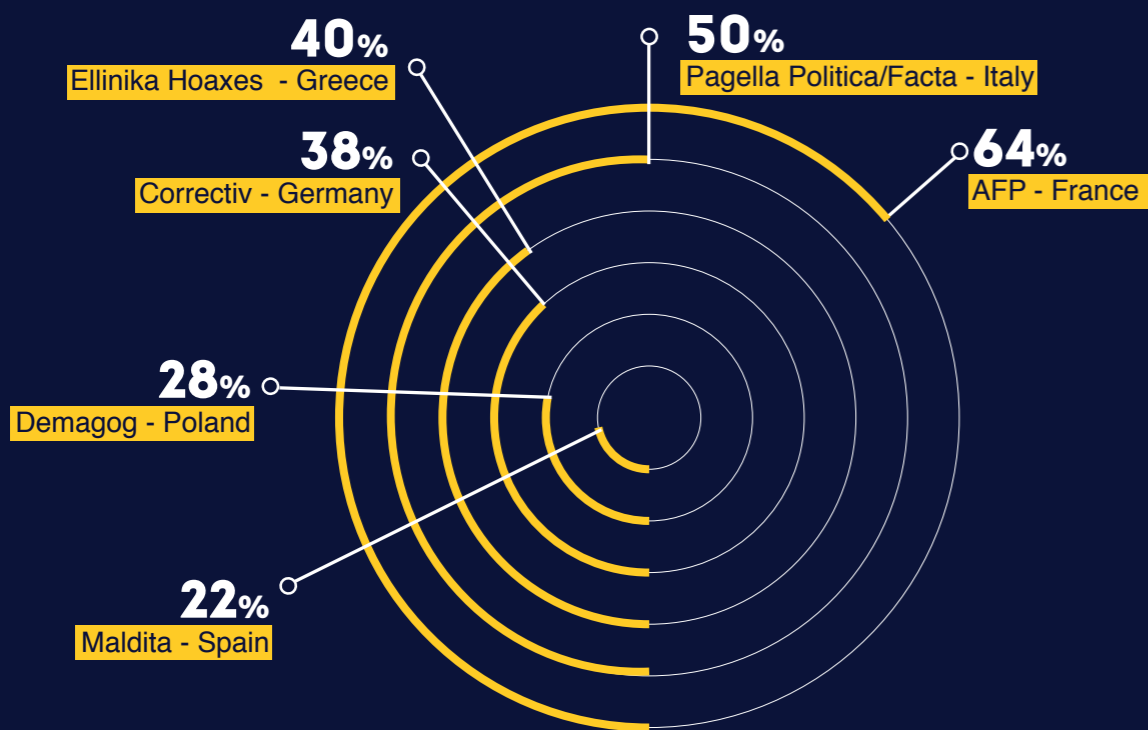

Monthly brief no. 3 – EDMO fact-checking network

Published on 16 September 2021

## MORE THEN 40% OF THE ITEMS VERIFIED IN AUGUST WAS COVID-19 RELATED

The 11 organizations\* that are part of the EDMO’s fact-checking network and contributed to this brief published a total of 1,152 fact-checking articles in August 2021. Out of these articles 473 (41%) concerned COVID-19 related disinformation.

*Significant variations exist among those organizations. For example, out of the total verifications, Maldita (Spain) reported that 22% were COVID-19 related, a number that rises to 28% for Demagog (Poland), to 38% for Correctiv (Germany), to 40% for Ellinika Hoaxes (Greece), to 50 % for PagellaPolitica/Facta (Italy) and to 64% for AFP (France).*

\* Organizations that contributed to this brief: AFP, Correctiv, Delfi, Demagog (PI), Dpa, Ellinika Hoaxes, Knack Magazine, Les Surligneurs, Maldita, PagellaPolitica/Facta, The Journal Fact-Check

## **IN AUGUST, COVID-19 DISINFORMATION TARGETED VACCINES, PCR TESTS, MASKS AND PROTESTS**

In August, the 11 organizations that are part of the EDMO's fact-checking network and contributed to this brief detected similar narratives about the pandemic in different countries, with the common intention of undermining or condemning, through the spread of false news, the efforts made in the different States to promote immunization campaigns.

According to these narratives:

- COVID-19 vaccines are not effective nor safe: e.g., they contain poisonous graphene oxide or they hurt and kill little children. In general, they kill more people than the virus itself, they are responsible for the variants and they caused a new wave of cases
- Pcr tests are also not safe and different States/health organizations took the decision to recall them
- Face masks are dangerous too (e.g., they can cause autism in children)
- Protests against “corona pass” and similars are much bigger than what the mainstream media shows
- Former anti-vaxxers infected with COVID-19 urging people to vaccinate are paid actors
- Not vaccinated people are being denied entry into supermarkets across Europe or their children can be taken from them”
- There are miraculous medicines against COVID-19, in particular Ivermectin, but those remedies are kept secret by mainstream media and Big Pharma

## **DISINFORMATION ABOUT AFGHANISTAN IS ALSO SPREADING THE SAME FALSE CONTENT ACROSS MANY EU COUNTRIES**

In August, the 11 organizations that are part of the EDMO's fact-checking network and contributed to this brief also witnessed a significant surge in the disinformation about Afghanistan, during and after the US withdrawal from the country.

Analyzing the materials gathered through the EDMO fact-checking network we found that:

- The vast majority of false or misleading content does not have a specific target and appears to be mainly attention-grabbing click-baiting (e.g. videos of violence against women, recorded in Syria in 2015 but now reframed as if shot in Afghanistan)
- A small but significant quantity of false or misleading content targets Western politicians or governments (e.g. accusation to German government to have flown almost empty airplanes during the evacuation)
- A small but significant number of false or misleading articles targets migrants

About migrants, in particular, the main message spread through false content (photos, videos and articles) is that the migrants are all male adults, "cowards" leaving behind "their women", and "not real refugees".

## THE MOST SIGNIFICANT VERIFIED DISINFORMATION STORIES AT THE NATIONAL LEVEL:

### IRELAND:

claims that (mostly young) people have died after receiving a COVID-19 vaccine and accusations to their families of being “murderers”

### GERMANY:

claims that 600 dead children were washed ashore during the floods in the German municipality of Bad Neuenahr-Ahrweiler last month

### BELGIUM:

claims that asymptomatic individuals would only spread a low dose of coronavirus, and therefore would not cause severe illness

## **METHODOLOGY**

The information contained in this brief was collected via a questionnaire sent to the fact-checking organizations that are part of the EDMO fact-checking network (<https://edmo.eu/fact-checking-community/>).

Reference period: 1-31 August 2021. Number of respondents: 11.  
Main editor of this brief: Tommaso Canetta, Pagella Politica/Facta.
