

AI-TO: THE PHOTO CHALLENGE GAME

NORDIS - Faktabaari's new game teaches media criticism and generative Ai to children and young people. This fast-paced photo challenge tests their skills in recognising real from AI-generated images.

IDMO'S INTERACTIVE ONLINE GAME SERIES

IDMO created in partnership with RAI (Public broadcaster) and TIM (Telecommunication service) a series of 4 online interactive games on misinformation, privacy and copyright, content creation and digital technologies and media.

"FACTOLOGY CHECKER" A SLOVAKIAN GAME

In collaboration with KlnIT, **CEDMO** developed an educational online game "Factology Checker" to teach players how to analyse and evaluate certain types of media message and false information narratives.

BENEDMO'S TOP SELECTION

BENEDMO identified more than 120 Dutch-language interventions from more than 75 providers and made a selection of the 23 most useful materials (teaching packages, games, videos,...) that Dutch-speaking professionals can implement in their programs on disinformation.

MEDIALOGUES: A podcast to talk media with your kids

"Médialogues en famille" is a series of podcasts developed by CLÉMI - **DE FACTO**, inviting parents to engage in dialogue with their adolescent(s) about the world of information, social networks, and screens. During the two seasons, you will be able to listen to the exchanges and questions of several families.

“

BY PRIORITIZING AND FOCUSING RESOURCES ON CONSTANT AND SUSTAINABLE MIL PRACTICE, WE WOULD CONTRIBUTE TO THE DIGITAL RESILIENCE OF SOCIETY IN A MUCH BETTER WAY [...] IT IS POSSIBLE TO KNOW WHAT WE ARE DOING NOT ONLY BY EVALUATING, BUT ALSO BY USING PRACTICAL EXPERIENCE AND ACTIVE PARTICIPATION

”

BECID, Junior Researchers, blogpost on the Media Literacy Matters Conference 2024

"InfoGrund in the online world", an online teacher training course by **HDMO**, now officially accredited in Hungary, offers blended sessions aiming to equip educators and teachers with awareness of disinformation, media, and online platforms. It targets understanding the causes of fake news spread and imparts practical skills in detecting false information and selecting quality content. Participants utilise Idea Foundation's eight-hour course package for grades 7-8 in school sessions.
