Digital World vs Fake News - Exclusive on Rai Sculoa

The Rai Cultura program (**IDMO**) airs a four-episode series titled "Digital World vs Fake News," exploring the depths of fake news. Through interviews with journalists, communication experts, university professors, EU representatives, and professionals in the education sector, the series sheds light on the mechanisms of misinformation and the ongoing battle against it.

From April 15 to June 15, the French Institute highlights media's role in battling fake news. Events include an exhibition titled "Fake news: art, fiction, lies," a film screening, a round table discussion on fake news and democracy (**HDMO**), and a screening of "Citizen Facts" followed by a discussion with journalists. Additionally, the Institute will host fact-checking training for journalists and journalism students and media literacy workshops for children as part of Media and Fake News Week.
