

#BeElectionSmart: an EU-wide EDMO campaign to support citizens in finding reliable election information and recognising false or manipulative content ahead of the 2024 European Parliament Elections. ➔

- TIP #1:** Read more than the headline
- TIP #2:** Look for the whole picture
- TIP #3:** Just because it's viral, doesn't mean it's true
- TIP #4:** Get your information from more than one source
- TIP #5:** Get your info about voting from reliable sources

EDUbox politics: From vote to policy

How does our political system work? How are decisions made? The political system can seem very complex, and it's not always clear how our vote influences the final policy. This EDUbox, developed with Mediawihs (**BELUX**) aims to provide young people with insights into the political process and let them discover the steps between an idea and eventual policy. ➔

AFP and BROD have launched two digital courses on tackling election disinformation. The first course covers tools to monitor campaigns and common disinformation types about candidates, parties, and the electoral system. The second course addresses harmful content on election day, including false voting requirements and fraud claims. Both courses provide practical examples and resources. ➔

Stay sharp during elections!
How cognitive biases and media influence our decisions

In this public YouTube Live webinar organised by SALTO Participation & Information, **BECID** team members explored the vulnerabilities that lie in each and every one of us – our flawed perceptions of the world. Cognitive biases are used against us in information manipulation activities, such as propaganda and strategic disinformation. ➔

IDMO has partnered with Google on a prebunking initiative called 'Learn to Spot Online Manipulation.' This initiative features in-depth short videos that help people identify and stop the spread of misinformation online. The videos cover common manipulation tactics such as scapegoating, decontextualization, and discrediting. ➔
