

RESEARCH / MAP AGAINST FAKE NEWS ON MIGRANTS

The Luiss Data Lab Migrant Map is an interactive document about immigration. It highlights the human cost of migration through data, the urgency of addressing migration issues and telling the truth behind the numbers.

BOOK/ A NOVA COMUNICAÇÃO

"The New Communication," (IBERIFIER), explores the study of networked communication, focusing on its effects on people rather than technologies. Covering topics like podcasting, disinformation, AI, and digital exclusion.

RESOURCES / AGAINST MISLEADING CONTENT

HDMO e-learning materials help students aged 13-18 develop skills to evaluate online content and think critically about misinformation. The course includes four topics with teacher guides and is designed for independent learning.

BE ELECTION SMART IRELAND!

Ahead of the General Election, EDMO Ireland promoted a Be Election Smart campaign. The campaign highlighted practical tips to be mindful of when navigating news, commentary, and advertising about the election.

DIGITAL WEEK IN FLANDERS

Organised by Mediawijs (BENEDMO) and other partners, the Digital Week took place from Saturday 2 to Sunday 10 November 2024 and highlighted the challenges of digitalisation. More than 450 activities were organised in Flanders and Brussels, including open days, workshops and other fun activities around digital skills and digital accessibility.

“

IF WE ARE GENUINELY COGNIZANT OF THE IMPORTANCE OF ACCURATE INFORMATION TO SOCIETAL COHESION AND DEMOCRATIC INSTITUTIONS, THEN MAINTAINING THE CURRENT STATUS QUO AND TACKLING DISINFORMATION THROUGH THE METHODS LISTED ARE AT BEST REACTIVE APPROACHES, ANALOGOUS TO TREATING SYMPTOMS AND NOT THE ILLNESS.

”

BROD, Article "Revising priorities: How can we most effectively balance disinformation narratives and freedom of expression within EU media policy?", November 2024

The NORDIS conference, "Disinformation in a Year of Elections," was held on November 18, 2024, at the Danish School of Media and Journalism in Copenhagen. It addressed disinformation's impact on the 2024 European Parliament and U.S. elections. Experts presented on extremism, conspiracy theories, and Russian interference, showcasing tools like AI-powered fact-checking. The event drew nearly 200 participants in person and online. **Check out the recordings.**
